**18<sup>th</sup> Premium Day**  
**International Congress on Implant-Prosthodontics**  
**June 2018, 28<sup>th</sup>-30<sup>th</sup>, Valencia Conference Centre**

The wonderful Valencia Conference Centre will be the location of the “International Congress on Implant Prosthodontics”, which will take place from **28<sup>th</sup>-30<sup>th</sup> June**, and represents an incredible opportunity to get updated on the most important and latest topics in modern implant prosthodontics.

The list of speakers is prestigious, starting with the pre-congress course and two brilliant personalities - Dr. Ignazio Loi and Prof. Dr. Giovanni Zucchelli - who will give a joint lecture in order to analyze the most interesting aspects of the B.O.P.T. protocol and the mucogingival surgery, respectively.

During the pre-congress session dedicated to dental technicians, Mr. Javier Pérez López and Mr. Antonello Di Felice will share their experiences on the management of the emergence profiles, both on the natural tooth and on implants.

The following two days of the Congress will be characterized by high level lectures with one leading topic: **Prama implant**.

Different sessions will be devoted specifically to clinicians, technicians and hygienists; thus this Congress represents an ideal chance for all professionals involved in the dental daily practice.

In parallel to the lectures, five hands-on sessions will take place in the Conference Centre, where the participants will have the chance to try and use many Sweden & Martina products.

**Enjoy this journey through clinical practice and science!**

On Friday, June 29<sup>th</sup> you are all invited to the Gala Party, being held in the scenic areas of the **Hemisfèric**.

The gala Party remains a unique opportunity to enjoy, to meet and share opinions with the speakers, all guests and the company staff.

The City of Arts and Sciences, without doubt the city's most modern and avant-garde area, is an impressive tribute to science, technology and nature. The Hemisfèric, designed by Santiago Calatrava, is a very particular and at the same time spectacular building, portraying an enormous human eye, the "Eye of Wisdom". This element represents the vision and observation of the world that visitors can discover with extraordinary audiovisual projections.

It was the first building of the City of Arts and Sciences, and was opened to the public on April 16<sup>th</sup>, 1998.

Its distinctive ovoid roof is over 100 metres long, and inside it is a huge sphere containing a projection room. The elliptical "Carl Sagan" perimeter ring of the Hemisfèric, dedicated to the great American astronomical communicator, surrounds the sphere of the projection room, which is protected by the building's massive roof.

An artificial lake of 24,000 square metres around the structure completes a complex of remarkable architectural beauty, which you can fully enjoy during the whole evening.

Do not miss this event!

**Sweden & Martina Gala dinner**  
Friday, June 29<sup>th</sup> 2018, h. 08.30 pm  
**Hemisfèric**

Av. del Professor López Piñero, 3 - 46013 València, Spain - Phone: +34 961 97 46 86

Attendance to the gala dinner is strictly by reservation; the access is monitored and the coupon collected at registration where the congress takes place must be shown when arriving at the gala dinner venue.
