PREMIUM DAY | SPECIAL PALMA

Palma Convention Centre

For several years now the Premium Day has been an opportunity one can't afford to miss in order to catch up on the latest innovations and trends of the world of dentistry, and the location chosen for this special edition is Palma de Mallorca, a marvel in the Mediterranean, merging art, beauty and tradition.

This congress focuses on soft tissues and the crucial role played by their proper management for the success of the entire oral implantoprosthesis rehabilitation. It is a topic of great importance calling for outstanding, experienced and first-class speakers: Xavier Rodríguez Ciurana, Ignazio Loi, Xavier Vela Nebot, Giovanni Zucchelli will therefore take turns on stage at the Palacio de Congresos, to involve the audience in what is by now universally known as the Convergent Revolution, with biological, histological and clinical reasoning on the advantages of this type of morphology when in contact with soft tissues. Whether it is a natural tooth, an implant neck or a prosthetic component, thanks to convergent geometry the connective tissue gradually thickens facilitating the regeneration of soft tissues which, besides supporting bones, will also contribute to the overall healthy and natural aesthetic appearance of the rehabilitation.

The Convergent Revolution is looking forward to seeing you in Palma...don't miss it!

MODERATORS

**Francisco Vijande
Díaz de Corcuera**

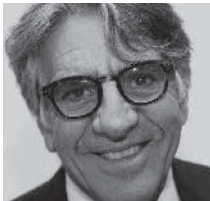

Directorate SEPA

Nacho Rodríguez

Former President SEPES

SPEAKERS

Ignazio Loi

Degree in Medicine and Surgery and specialisation in Odontostomatology and Prosthodontics at the University of Cagliari. Active member of the Italian Academy of Prosthetic Dentistry. Private dental practitioner in Cagliari. Co-author of several books and scientific publications.

Xavier Rodríguez Ciurana
