**REGISTRATION AND
INFORMATION**

The background is a dark, gradient field transitioning from black at the top to a soft, warm glow at the bottom. It is filled with a complex network of thin, glowing lines in shades of gold, silver, and light blue. These lines are mostly curved and intersect to form a web-like pattern. Scattered throughout the scene are numerous small, bright white and light blue dots, resembling stars or particles in a cosmic or digital space.

WELCOME

Science, clinics, technology: three words which summarise as a solo act the essence of this 19th edition of the Premium Day.

It has become a must for all those who wish to keep up to date, meet, exchange views and grow, in the constructive and convivial atmosphere which has always distinguished this congress.

When one reads the programme it is clear that the Premium Day 2020 has only one key player: Prama, the one and only intramucosal implant, which by now has conquered everybody and continues to excite and amaze.

So join us in this journey through Prama's many nuances, with outstanding speakers who will guide us along a path of long-term successes in implant prosthodontics, stable tissues, scientific evidence, technology applied to clinics, innovation and the consolidation of tradition.

A journey which may turn out to be a confirmation or a pleasant discovery, but which will not leave you indifferent.

We are ready. What about you?
